

TESLA WALL CONNECTOR INSTALLATION

Location: Plymouth, Massachusetts

Project Overview

BD Electrical & Solar installed a Tesla Wall Connector to provide dedicated Level 2 EV charging at the homeowner's residence. The charger was hardwired into the home's electrical system and positioned for convenient driveway charging.

The Solution:

The installation included:

- Tesla Wall Connector
- Dedicated Level 2 EV charging circuit
- Hardwired electrical connection
- Exterior-rated installation
- Charger placement for convenient vehicle access
- Testing and commissioning

The Result:

The homeowner can charge their Tesla at home using a dedicated Level 2 charging station, providing substantially faster and more convenient charging than a standard 120V outlet.
